

Reliable, Secure, Dedicated Internet & Telephone For Your Business

Solarus delivers options and pricing to help you reach your business goals

Local Choices, Big Impact

Solarus has been successfully serving central and northern Wisconsin with quality telecommunications service at a fair price for over a century.

We continue to grow and expand our services while still being an independent small business owned by shareholders right here in central Wisconsin. Solarus provides over 150 local jobs and studies show that for every \$100 dollars spent with a local business—\$45 gets reinvested directly right back into the community. Simply put, the money spent in Wisconsin, stays in Wisconsin! Our company also proudly supports area Chambers of Commerce, schools and non-profits in the cities we serve.

Solarus High Speed

Dedicated to Speed

Solarus uses dedicated lines, which means the Internet speed you pay for is the Internet speed that gets delivered. Internet delivered by cable *is not* a dedicated line and bandwidth gets shared among a group of users from the same delivery line. Speed decreases relative to the number of users online. Solarus speed is always constant and reliable.

The Key is Symmetry

Solarus Internet speeds are symmetrical, meaning upload and download speeds are the same. You won't notice a difference whether you want to download music or watch online videos or send large files to clients.

Always On, Always Here

One of the hallmarks of the incredible Solarus customer satisfaction rate is our 24/7/365 LOCAL technical support. If you ever have a question, your call will be answered by a technical service representative working here – in central Wisconsin – day or night.

Solarus Telephone

Solarus Telephone

Cost is in your control with Solarus Unlimited Local and Long Distance service. For one low monthly rate you can call anywhere in the U.S. Alaska, Hawaii, Puerto Rico and Canada and make all the business deals you can.

Telephone Service Features

Our telephone service includes: voice mail, caller ID with name and number, call waiting, integrated messaging and you can keep your current phone number!

Always Open for Business

Your business won't miss an opportunity, even if the power fails, with a Solarus self-powered, dedicated phone line.
